

ANTARI Z-300II Fazer w. timer controller

No. 51702675

- + Combination of fog and haze machine on water basis
- + Extremely silent operation without air compressor
- + Creates a fine, continous haze without bursts of fog

- Combination of fog and haze machine on water basis • Extremely silent operation without air compressor • No need for special fluid - operation with normal fluid
- Creates a fine, even and translucent haze without bursts of fog - perfect for accentuating lighting effects • Continuous output • Metal housing with carrying handle • Fixed tank, fluid level indication with LED • Low fluid detector • Control via supplied cable remote control Z-6 • Functions of the Z-6: timer with interval, duration and output volume; continuous output; manual activation • Perfect for noise-sensitive applications

Technical specifications:

|                     |                                    |
|---------------------|------------------------------------|
| Power supply:       | 230 VAC, 50 Hz ~                   |
| Power consumption:  | 700 W                              |
| Tank capacity:      | 1.3 l                              |
| Warm-up time:       | 4 min.                             |
| Fluid consumption:  | approx. 1 l/h                      |
| Output volume:      | 2000 cft/min. (approx. 57 m³/min.) |
| Dimensions (LxWxH): | 530 x 210 x 220 mm                 |
| Weight:             | 9 kg                               |

Accessories:

|                                           |              |
|-------------------------------------------|--------------|

ANTARI F-3 Fazer

No. 51702680

- + Integrated in a stackable flight case
- + Low-noise operation ideal for theater and stage applications
- + Fine translucent haze ideal for accentuating light and laser beams
- + Vertical and horizontal fog output possible
- + Control via integrated DMX interface or LCD control module

DMX

- Integration in a stackable flight case makes the machine tough, durable and easy to carry • Low-noise operation without air compressor ideal for theater and stage applications • Produces fine, translucent haze without nebulizing the room at the same time • Ideal for accentuating light and laser beams • Vertical and horizontal fog output possible • Combines the reliability of a fog machine with the extremely silent operation of a haze machine • Extremely low fluid consumption rate at 5 hours continuous output per liter • Operates on standard waterbased fluid
- Removable tank • Super fast heat-up time of 90 seconds • Fan speed variably adjustable • Self-cleaning function • Control via integrated DMX interface or control module with LCD screen (functions: timer with interval, duration and output volume; continuous output; DMX starting address, fan speed, pump sensor) • PowerCon mains connector (cable included)

Technical specifications:

|                     |                                    |
|---------------------|------------------------------------|
| Power supply:       | 230 VAC, 50 Hz ~                   |
| Power consumption:  | 900 W                              |
| Heater:             | 800 W                              |
| Tank capacity:      | 2.7 l                              |
| Warm-up time:       | 90 seconds                         |
| Fluid consumption:  | 5 hrs/liter                        |
| Output volume:      | 3000 cft/min. (approx. 85 m³/min.) |
| DMX connection:     | 5-pin XLR                          |
| Dimensions (LxWxH): | 540 x 500 x 235 mm                 |
| Weight:             | 20 kg                              |

Accessories:

|                                           |              |

ANTARI HZ-350 Hazer

No. 51702685

- + High-performance hazer for large clubs, stage productions, discos and industrial applications
- + Intelligent wireless control system with 50 m range
- + Continuous output without reheate cycles

DMX

- High-performance haze machine with digital wireless control system and DMX interface for large clubs, stage productions, discos and industrial applications
- Creates a fine, even and translucent haze without bursts of fog - perfect for accentuating lighting effects • Intelligent wireless control system with 50 m range eliminates irksome cables • Continuous output without reheate cycles • 2.8 liter tank capacity and fluid level indication • Suitable for oil and waterbased fluids • Low-noise, maintenance-free air compressor • Metal housing with carrying handle
- Multiple control options: per integrated control module with LCD screen, DMX interface, included wireless transmitter W-1 or the optional timer remote control HC-1 • Adjustable timer with interval, duration and output volume • Continuous output with adjustable fog volume or manual activation with maximum fog volume
- Continuous activation via handy transmitter W-1 • The transmitter allows simultaneous control of an unlimited number of haze machines

Technical specifications:

|                     |                                    |
|---------------------|------------------------------------|
| Power supply:       | 230 VAC, 50 Hz ~                   |
| Power consumption:  | 315 W                              |
| Tank capacity:      | 2.8 l                              |
| Fluid consumption:  | 21 hrs/liter                       |
| Output volume:      | 2000 cft/min. (approx. 68 m³/min.) |
| Air pressure:       | 2 bar                              |
| DMX connection:     | 5-pin XLR                          |
| Dimensions (LxWxH): | 492 x 273 x 315 mm                 |
| Weight:             | 14 kg                              |
